FlowLink

The Payment Layer for the Agent Economy

Bridging the compliance gap between crypto and traditional finance. Built on HashKey Chain.

PITCH DECK • 2026 • BUILT ON HASHKEY CHAIN

Allan's Story: A Visa Denied

- Allan received a **full scholarship** to study in Germany. Tuition, housing, and stipend were all covered.
- His visa was **rejected**. Why? Traditional banks couldn't recognize his crypto-based proof of funds.

Allan didn't just need a receipt. He needed a payment reputation the world could read.

A Global Challenge for New Actors

International Students

Unable to prove financial stability for visa applications despite having significant crypto assets.

Global Businesses

Struggling with regulatory compliance when using stablecoins for cross-border payments.

Remote Workers

Cannot provide acceptable proof of income when paid in cryptocurrency for loans or housing.

DAOs & Web3 Orgs

Facing barriers to mainstream integration due to lack of compliant, auditable payment trails.

The Problem: A Massive Trust Gap

$27T

Stablecoin volume in 2024,
more than Visa

$47B

AI agent market
by 2030

> **The money is already moving. Agents are already coming. The compliance layer doesn't exist yet. FlowLink is that layer.**

The Trust Gap in the Agent Economy

Autonomous Actors

AI agents are hiring, paying, and transacting independently, yet they lack a verifiable financial history.

No Reputation

Without a trust layer, agents cannot verify each other's reliability, making trustless commerce impossible.

The lack of verifiable reputation is the single biggest bottleneck for the $100B+ autonomous commerce market.

FlowLink: The Trust Layer

Instant Compliance

Sanctions screening, KYC verification, and Travel Rule data sharing built directly into the payment infrastructure.

Regulatory-Grade Receipts

Every transaction generates auditable proofs and PDF receipts that satisfy CFOs, auditors, and global regulators.

One-Click Payments

Gasless UX eliminates blockchain complexity while maintaining full regulatory adherence for every transaction.

Our Product Ecosystem

FlowLink Platform

- User-facing invoicing
- Stablecoin payment links
- Intuitive human dashboard
- Real-time settlement logs

ProofLink Engine

- On-chain compliance engine
- Verifiable audit trails
- Real-time OFAC screening
- Regulatory-grade receipts

Reputation Score

- Portable trustless scores
- Agent-to-agent commerce
- Verifiable payment history
- Unlocks DeFi collateral

How It Works: Architecture

User or Agent

Initiates payment or invoice request

Dashboard

FlowLink interface & intent detection

Smart Contract

Settlement on HashKey Chain (ID 133)

ProofLink

On-chain compliance & audit trail

Reputation

PDF Receipt & Verifiable Score

Minimal friction. Maximum trust. Fully autonomous.

Why HashKey Chain?

Regulated Foundation

FlowLink inherits compliance from a **licensed, regulated chain**. KYC happens at the network level, ensuring every actor is verified.

Native Trust Layer

HSP mandates enable trustless payment authorization natively. We don't replicate compliance; we leverage the chain's core architecture.

Institutional Grade

Built on **Chain ID 133**, the premier regulated blockchain designed specifically for institutional finance and secure digital assets.

Why Us & Business Model

Why Us

- **vs Request Finance**
  No compliance layer for institutional trust.
- **vs Coinbase Commerce**
  No dedicated rails for autonomous AI agents.
- **vs Raw Stablecoins**
  No verifiable audit trail or reputation score.

Business Model

0.5% Transaction Fee
Standard fee for all on-chain settlements.

ProofLink SaaS
Enterprise-grade compliance & audit subscriptions.

Traction: Live on HashKey Testnet

The Team Behind the Vision

Pablo (Ernest Akakpo)

ARCHITECT, BUILDER & DESIGNER

5 years in blockchain with a focus on emerging markets across Africa. Leading the core architecture and design vision.

@korkuernest

Akash

AGENT ECONOMY LEAD

Currently studying at MIT. Responsible for all AI agent infrastructure and autonomous transaction logic.

Allan

SMART CONTRACT DEVELOPER

6 years of smart contract experience. Responsible for all on-chain logic and ProofLink audit contracts.

The Trust Layer for the Next Economy

Internet: **SSL**

DeFi: **Audits**

Agent Economy: **FlowLink**

Join us in building the infrastructure for autonomous commerce.
